

# Project Leadership

The complete experience of running a challenging large scale project - in an AI Computer Simulation

Develop skills for managing risks, timelines, budgets, resources and key stakeholders to achieve the right business outcomes.

In a rapidly changing world, organisations need people who can lead projects with confidence and skill. The simulated environments develops and hones the ability to lead and build consensus in change projects, for the organisation to move at pace and remain resilient.

## Beneficial for those who have to deliver transformational change projects

- Project and programme Managers
- Project Team Leaders and Team members
- Business Improvement and Innovation Teams

## Academically renowned AI Simulation

- Provides guidance and practice in decision making under pressure, with incomplete or ambiguous information.
- Builds collaboration and communication skills, both within a team and with wider business stakeholders.
- Complements any best practise methodology or process.
